CURRENT RESEARCH PROJECT

Uneasy Yoke: Selected Documents relating to the Union of Trinidad and Tobago (2 vols.)

This book is a selection of the documents related to the decision to unify Trinidad and Tobago in 1889, and to the working of that Union since then. In all, approximately 140 documents are included, dating from 1869 (when the Union was first contemplated in the Colonial Office) to 2018. Each document (or group of documents) is preceded by Notes, giving the background and context in which it (or they) was (or were) created. Because of the paucity of research on Tobago, where necessary, substantial essays are written to link the documents. There will be at least 100 photographs.

Uneasy Yoke puts into the hands of its readers verbatim texts of **all** the major documents in the history of the Union of Trinidad and Tobago. Since there is no published work on the East Indian presence in Tobago, it includes two short essays on the subject that I have written.

Uneasy Yoke recovers and preserves a part of the national heritage on which far too little is known. It will help scholars, legislators, lawyers, journalists, teachers, and general readers to have a factual basis for understanding the making of the Union, and the frictions that have attended it over time. Readers interested in Caribbean regional integration will find it helpful.

Expected year of completion: 2019.
